

Syed Bahauddin

Full-Stack Developer | AI & Automation Developer | MCA Student

+91 6281919671 syedbahauddin991@gmail.com linkedin.com/in/syed-bahauddin Hyderabad, Telangana, India

Professional Summary

MCA student with hands-on experience in full-stack web development, AI automation, and software engineering through internships and personal projects. Experienced in building web applications, workflow automation systems, AI-powered tools, and educational software platforms. Published researcher in browser security with experience working in startup and international remote environments.

Technical Skills

Languages	JavaScript, Python, HTML5, CSS3
Frontend	React.js, Tailwind CSS, Bootstrap, Responsive Web Design
Backend	Node.js, Express.js, Flask, REST API Development
Databases	MySQL, MongoDB, Firebase, Supabase
AI & Automation	OpenAI API, AI Chatbot Development, Prompt Engineering, n8n, Make.com
Tools	Git, GitHub, VS Code, Postman, Figma
Cybersecurity	Browser Extension Development, Web Security Analysis, Security Research

Work Experience

Frontend Developer Intern

3 Months

Lokachakra (Startup), Hyderabad

- Worked as the primary frontend developer for an early-stage startup.
- Developed responsive web interfaces and user-facing features.
- Collaborated with founders and team members to implement product requirements.
- Participated in testing, debugging, and feature improvements.

Automation Engineer Intern

3 Months

Global Talent (Dubai-Based), Remote

- Built AI-powered automation workflows for content creation and video production.
- Designed automation pipelines using Make.com and n8n connecting LLM APIs, audio synthesis, and video assembly tools.
- Developed Python scripts for API integrations, media processing, and workflow support.
- Worked with international teams to deliver automation solutions.

Freelance Web Developer

Ongoing

Self-Employed, Remote

- Designed and developed responsive websites and landing pages for clients.
- Managed end-to-end delivery including client communication, development, and deployment.
- Handled post-launch support, performance optimisation, and hosting configuration.

Projects

EduERP — Educational ERP Platform

JavaScript, Python, Node.js, MySQL, AI Integration

- Developed an ERP platform for educational institutions covering attendance, examinations, fee management, admissions, and administration.
- Implemented role-based access control for administrators, faculty, students, and parents.
- Integrated AI-powered features to support workflow automation within the platform.

Problem Solver AI — AI-Powered Website Generator

JavaScript, Python, OpenAI API

- Built an AI chatbot capable of generating website layouts and code from natural language prompts.

- Integrated LLM APIs to process user requirements and generate web content.

Browser Security Analyzer Extension — Published Research

JavaScript, Browser Extension API, Cybersecurity

- Developed a browser extension that analyses website security indicators in real time.
- Evaluates SSL certificates, tracking technologies, security headers, and cookie policies.
- Research based on this project was formally published in the web security domain.

Zorvexra — Developer Collaboration Platform

zorvexra.in

JavaScript, HTML5, CSS3, Node.js

- Co-developed a platform for project submissions, developer portfolios, and contribution tracking.
- Built responsive user interfaces and collaborated through Git and GitHub workflows.

Research Publication

Browser Extension for Real-Time Website Security Risk Analysis

Published research focused on browser security, threat detection methodologies, and website risk analysis.

Education

Master of Computer Applications (MCA)

Aurora Deemed to be University, Hyderabad

2024 – 2026

Bachelor of Computer Applications (BCA)

Siddharta Degree College, Hyderabad

2021 – 2024

International AI Workshop

UCSI University, Kuala Lumpur, Malaysia

2025

Certifications

- NPTEL — Soft Skills Development | IIT / MHRD, Government of India

Achievements & Additional Information

- Published research paper in the browser security domain.
- Participated in International AI Workshop at UCSI University, Malaysia.
- Completed internships at both a Hyderabad-based startup and a Dubai-based company.
- Developed multiple full-stack applications, AI-powered tools, and automation systems.
- **Languages:** English (Advanced), Hindi (Native), German (Beginner).
